

TIMSS27 FT - Submission - Plunet Guide for IEA

Access

Access the platform with the following link: <https://plunet.capstan.be>

Log in with your credentials.

Usernames are your email addresses.

The password is set up on your side. If you forget the password, please use the password reset sequence **Set up new password**) from the login screen to set a new password.

A screenshot of the Plunet login interface. The form is titled "Login" in the top left corner, with a language selector "EN" and a dropdown arrow in the top right. Below the title, there are two input fields: "User name" and "Password". The "Password" field has a small "Set up a new password" link to its right and a toggle icon (an eye) to its right. Below the input fields is a blue "Log in" button. At the bottom of the form, there is a link that says "Problems during login?".

Workflow

The workflow for TIMSS27 FT in Plunet is set up as shown above. The active step outlined in these instructions is shown in red and explained below.

Client Submission (CSU): This step is used to track which translation sets need to be submitted to cApStAn. Once the client submits the materials, the status changes so cApStAn knows they are ready for verification.

Verification (VER): At this step, cApStAn performs translation verification and review to ensure quality and consistency. When verification is complete, the task moves forward in the workflow.

Client Review (CRE): Here the client reviews the verified files to confirm they meet expectations. The client may approve the files, request revisions, or share comments with cApStAn. If there are no queries, the client deliver the task , and cApStAn will sign it off at the CSO step.

Query Resolution (QRE): This step is used if the client's review raises questions or requires changes. cApStAn addresses the comments, makes the necessary updates, and resubmits the files for review.

Client Sign-off (CSO): This is the final approval stage of the workflow. The client confirms that all verification and revisions are complete and no further action is needed. Once signed off, the files are finalized and remain with status Delivered till the end of the project.

Navigation

To submit a locale and set for verification, make sure you are logged in with the correct user account.

1. In your dashboard, click on **Jobs (###)** and get the list of all jobs below. Where **###** is the total number of jobs currently with IEA.

Work instructions

1. Read the step-by-step instructions on submitting to cApStAn. Please let us know if something is unclear.
2. Upload the required files (if any, e.g. Style Guide) for the submission of this localset.
3. Leave a "Delivery comment" with your submission for cApStAn (PMs, in case there are things they need to know (if needed, e.g. "Please ignore any comments in Item 11111").
4. Use the "Final delivery" button to send the notification without finalizing the set submission (e.g. with comment "Please note that this version is going to be submitted later, on 10/10/2025" or "the set is dropped").
5. Use the "Final delivery" button to send the notification and finalize the submission.

6. In the Comment field, you will find links to the specific instructions created by cApStAn for IEA on the Plunet platform generally, and specifically about submission (these instructions included).

Comment

This job exists, so that the IEA TIMSS27 Team can submit this set to cApStAn. This includes workflow step transitions, notifications and file sharing.
